New York, NY 10022

Dear Sir or Madam,

I am a full professor of Epidemiology and Public Health at the School of Veterinary Medicine, Purdue University. One of my research interests is using naturally occurring diseases in animals as a model to study human disease. We have developed a methodology for using dogs with naturally occurring lung cancer to quantify carcinogenicity of radon adjusting for environmental tobacco smoke.

Would you please send me information on the research grants program sponsored by the Tobacco Institute and an application for research support.

Thank you for your attention to this matter.

Sincerely,

A handwritten signature in cursive script that reads "Larry T. Glickman".

Larry T. Glickman, VMD, DrPH
